## Assessment-Design-Construction-Consultation

Freestone Aquatics, Inc. strives for innovative solutions to meet your fishery and wildlife goals, specializing in aquatic habitat restoration, enhancement, and creation. Working with landowners to understand their goals, we have the ability to evaluate the ecosystem at present, identify the limiting factors, and then design and implement a management plan promoting a healthy and sustainable aquatic ecosystem.

## Services

- Habitat design, construction, monitoring, and management
- River and lake restoration
- Channel, bank & instream flow assessment
- Population survey- fish, forage, macroinvertebrates
- Aquatic vegetation identification and treatment
- Water quality analysis
- Hydraulic modeling
- Existing lake analysis
- New lake construction
- Biosafe lake treatments
- Custom lakebed aeration
- Wetland delineation
- Permitting & Consultation

Our people have a wide range of experience, from back yard ponds to exclusive life-style communities that depend on their aquatic resources. Freestone Aquatics, Inc provides customized services to meet the needs of small and large projects alike.
